
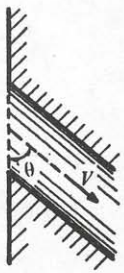
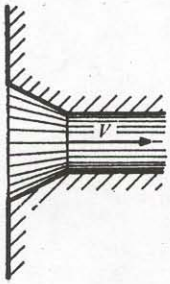
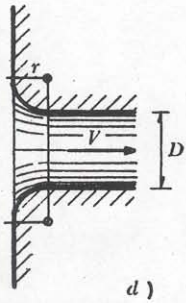
a) $K = 0.5$



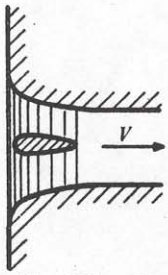
b) $K = 0.5 + 0.3\cos\theta + 0.2\cos^2\theta$



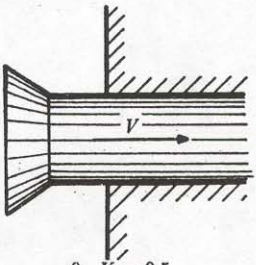
c) $K = 0.15$ a 0.25



d)

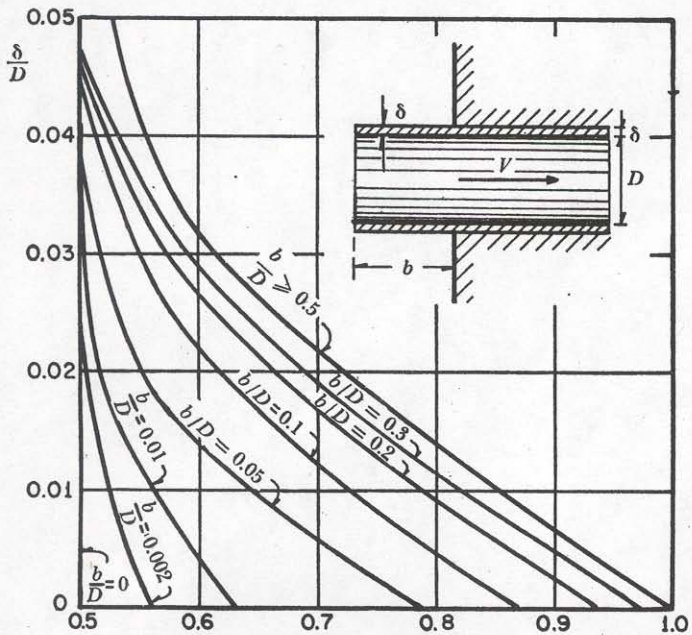


e) $K = 0.06$ a 0.10

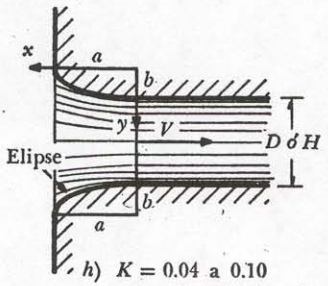


f) $K = 0.5$

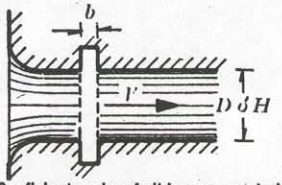
r/D	0	0.04	0.08	0.12	0.16	>0.2
K	0	0.26	0.15	0.09	0.06	>0.03



g) Valores de K



h) $K = 0.04$ a 0.10 para tubo circular; ó de 0.07 a 0.2 para tubo rectangular.



i) Coeficientes de pérdida por escotadura $K = 0.05$ a 0.10, si $b/D > 1$ ó $b/H > 0.2$ y $V > 2$ m/seg. De lo contrario, $K \doteq 0$.
